

The Indiana Attorney General's office informs us that the FCC wishes to dilute Indiana's "No Call" privacy law. PLEASE do not tamper with this law. It is the only decent piece of legislation to come out of the Indiana Statehouse for some time. My husband and I were bothered by as many as 5 phone calls a night, interrupting our dinner, our children's homework time, and our own personal phone calls. Since we enrolled on the "Do Not Call List" in April, our "junk" calls have literally stopped. This is absolutely no exaggeration. It is the best thing ever!!! Leave our laws alone. Thank you.
